Visitors expected	over 1,000,000 trade professionals and public
Frequency	bi-annually in Shanghai
Website	www.autoshanghai.auto-fairs.com

Auto Shanghai shows the future of driving

The theme of Auto Shanghai will be all about the car of the future. The key issues of electromobility, autonomous driving and connected cars are more relevant in China than ever. Electric and hybrid cars play a huge role in China and are massively subsidized by the government in an effort to improve the air quality in China's megacities despite the constant increase in the number of cars on the road. Thus, China has superseded the USA as the world's largest market for new energy vehicles. From 2019, the Chinese government will set minimum targets for manufacturers in producing and selling alternative drive systems. Experts believe that sales of vehicles with alternative drive systems will surpass the 2 million mark by 2020.
